Professional Summary

Results-oriented Python/Django Developer and Data Analyst with experience in backend development, SQL-based reporting, and data automation within the banking domain. Skilled in designing secure web applications, optimizing databases, and delivering performance-driven dashboards. Adept at translating business requirements into scalable technical solutions, improving workflows, and ensuring data accuracy. Known for a detail-focused mindset, strong analytical ability, and the ability to collaborate across technology and business teams.

Education

MBA in Marketing

ASM's Institute of Business Management & Research (IBMR), Pune – Savitribai Phule Pune University

2022 – 2024 | CGPA: 7.35

Bachelor of Engineering (Computer Engineering)

Sinhgad Institute of Technology and Science, Pune – Savitribai Phule Pune University

2016 – 2021 | CGPA: 7.38

XII (Science)

Veer Rani Channamma Rural Education Institute, Kunnur – Board of School Education, Hubli, Karnataka

2016 | Percentage: 66.50%

X (General)

Vasant Vihar High School & Jr. College, Thane – Maharashtra State Board

2014 | Percentage: 72.40%

Skills

- 1. SQL & Databases:** MySQL, Oracle, PL/SQL, PostgreSQL, SQL Server, Complex Joins, Subqueries, CTEs, Window Functions, Views, Stored Procedures, Indexing, Query Optimization, Performance Tuning
- 2. Python & Backend Development:** Python, Django, REST APIs, File Processing (CSV/TXT/Excel), Automation Scripts, ETL Pipelines, Error Handling, Logging, Data Validation
- 3. Frontend & Web Technologies:** HTML, CSS, JavaScript, Responsive UI Development, Template Integration, Form Handling
- 4. Data Analysis & Excel:** Advanced Excel, VLOOKUP/XLOOKUP, Pivot Tables, Charts, Conditional Formatting, Data Cleaning, Data Validation, Reconciliation Analysis
- 5. Reporting & Data Visualization:** MIS Reports, Operational Dashboards, Exception Reports, Filters, Slicers, Power BI (Basic), Tableau (Basic)
- 6. Data Engineering & Automation:** Batch Processing, File-Based ETL, Large Dataset Handling, Record-Level Validations, Reconciliation Logic, Scheduling & Monitoring
- 7. Version Control & Developer Tools:** Git, GitHub, VS Code, Postman, SQL Developer, MySQL Workbench
- 8. Banking & Domain Knowledge:** Banking Data Processing, Daily MIS, Audit-Support Reporting, Data Accuracy & Compliance, Internal Application Support
- 9. Soft Skills:** Analytical Thinking, Problem Solving, Stakeholder Communication, Requirement Gathering, Team Collaboration

Experience

Assistant Manager – Django/Python Developer

The Greater Bombay Co-operative Bank Ltd. – Mumbai

October 6, 2025 – Present

1. Developed automated ETL pipelines using Python to process and transform raw banking data.
2. Designed and generated financial and operational reports using SQL and Python for business insights.
3. Built automated reporting systems with dynamic formatting, validation checks, and scheduling.
4. Developed internal web applications using Django, Flask, and JavaScript to streamline workflows.
5. Implemented backend logic, file processing, and user-friendly interfaces for internal tools.
6. Optimized SQL queries and improved performance for large datasets, reducing report generation time.
7. Performed data cleaning, validation, and transformation to ensure data accuracy and consistency.
8. Collaborated with stakeholders and resolved data/reporting issues for smooth operations.

IT Executive – SQL/PLSQL

Tata Capital Limited (TCL), Thane – via ConneQT Business Solutions

April 11, 2022 – January 2, 2023

1. Troubleshoot and resolved SQL/PLSQL database issues as part of support for enterprise clients.
2. Developed and executed SQL queries for data retrieval, analysis, and problem diagnostics.
3. Performed query tuning and database optimization to enhance performance and reduce load times.
4. Collaborated with cross-functional teams to identify and solve complex database issues.
5. Monitored database health using tools and generated performance reports for internal use.
6. Created SQL scripts and basic automation tools to streamline recurring support tasks.
7. Participated in testing and validation of software updates and database patches for compatibility.
8. Documented technical resolutions and contributed to the internal knowledge base for future training.

Projects

E-commerce Order Analysis using Excel

Tools: MS Excel (Advanced Formulas, Pivot Tables, Dashboards)

Analyzed 500+ e-commerce transactions to identify sales trends and product performance using Excel formulas, pivot tables, and interactive dashboards.

Sales & Orders Management System using MySQL

Tools: MySQL, MySQL Workbench

Designed a normalized MySQL database with complex SQL queries to analyze sales, customer behavior, and payment trends.

Banking Data Processing & MIS Automation (Internal Project)

Tools: Python, SQL, Excel

Automated daily banking file processing and MIS reporting using Python and SQL with validation and reconciliation checks.

Internal Reporting & Reconciliation Web Module (Internal Project)

Tools: Django, Python, SQL, HTML, CSS, JavaScript

Built secure Django-based dashboards to display operational reports and reconciliation summaries for internal users.
